

ANWESHA ABANTIKA

anweshabantika@gmail.com | +91 9437617519 | Berhampur, Odisha, India

PROFESSIONAL SUMMARY

ECE graduate skilled in Python, SQL, Power BI, Pandas, and data visualization with hands-on experience in data analytics and automation. Experienced in building dashboards, performing exploratory data analysis, and extracting actionable insights from real-world datasets.

TECHNICAL SKILLS

Programming: Python, SQL

Data Analysis: Pandas, NumPy, Excel, EDA, Data Cleaning

Visualization: Power BI, Matplotlib, Seaborn

Databases: MySQL

Tools: Jupyter Notebook, VS Code, Power Query

PROJECTS

Netflix Data Analysis

- Performed exploratory data analysis on 8,000+ Netflix titles using Python, Pandas, and Power BI.
- Built interactive dashboards to analyze genre distribution, maturity ratings, release trends, and country-wise content production.
- Identified that 69.7% of Netflix content consists of movies while TV-MA was the most common rating category.

Neural image Compression giga pixel histopathology analysis

- Developed a deep learning-based medical image compression system using Python, OpenCV, and CNN models.
- Applied histogram analysis and tumor classification techniques on histopathology images.
- Built an interactive web application for real-time image upload and prediction visualization.

EXPERIENCE

Python Programming Intern | Main Flow Services and Technology Pvt Ltd | Jun 2024 – Aug 2024

- Automated data processing and web scraping workflows using Python and BeautifulSoup.
- Developed billing systems and currency conversion tools.
- Worked with CSV and Excel datasets for data cleaning and reporting tasks.

CERTIFICATIONS

- SQL Basics – Hacker Rank
- Data Fundamentals – IBM
- OCI AI Foundations Associate – Oracle
- Data Analytics Job Simulation – Deloitte

EDUCATION

Bachelor of Technology (ECE) | Roland Institute of Technology | CGPA: 8.5 | 2022 – 2026

ACHIEVEMENTS

- Solved 50+ SQL and coding problems on LeetCode.
- Built multiple end-to-end data analytics dashboards using Power BI.
